SUMMARY

AI Engineer (B.Sc. (Hons.) Information Technology, PUCIT, 2026, CGPA 3.29/4.00) who builds AI applications in Python, from data pipeline to API: RAG systems, LLM-powered agents and deep-learning models. Built a legal-document RAG system with Weaviate at PixelPK Technologies, a multi-agent system at PUCIT, and a YOLOv8 model trained on 58,000+ images (85%+ mAP).

SKILLS

Languages: Python, SQL
AI & LLMs: LLM APIs (Gemini, Groq), RAG, LangChain, prompt engineering, Weaviate, hybrid search, reranking, embeddings, MCP, A2A, Google ADK, n8n
Machine Learning: PyTorch, scikit-learn, YOLOv8, DINOv2, OpenCV
Backend & Cloud: FastAPI, REST APIs, asyncio, MySQL, AWS S3, Docker, GitHub Actions, Git

EXPERIENCE

AI/ML Intern, PixelPK Technologies (Remote) Jun 2026 - Jul 2026

- Built a pipeline that scrapes court judgments, converts PDFs to Markdown, extracts metadata with an LLM (Groq), stores files in AWS S3 and serves them through a FastAPI API.
- Developed a Weaviate RAG system with hybrid search and reranking for legal-judgment retrieval.
- Designed the scraper to be court-agnostic, so new courts can be added without reworking the core code.

AI Developer Intern, PUCIT, Lahore Dec 2025 - May 2026

- Architected a 4-agent system (Orchestrator, Generator, Validator, UI Controller) with FastAPI, asyncio and JSON-RPC 2.0; added per-agent telemetry with Google ADK.
- Built MCP servers (fastmcp) that let LLM agents call databases as tools.
- Built RAG workflows with Gemini 2.5 Flash and n8n on the WhatsApp Business API, serving 50+ concurrent sessions.

MERN Stack Developer Intern, BixForge Solutions (Remote) Jun 2025 - Aug 2025

- Built a secure, scalable admin dashboard on the MERN stack (MongoDB, Express, React, Node.js), showing strong frontend and backend logic and full-stack integration.
- Developed and integrated REST APIs between the React frontend and Node.js backend, working closely with the team through delivery.

Teaching Assistant, Software Engineering, PUCIT, Lahore Nov 2025 - Apr 2026

- Assisted students and instructors in the Software Engineering course.

PROJECTS

Judgment Scraper

- Court-agnostic pipeline that scrapes court judgments, converts PDFs to Markdown, extracts metadata with an LLM, stores files in AWS S3 and serves them through an API; Weaviate hybrid search with reranking for judgment retrieval. *Python, Groq, Weaviate, FastAPI, AWS S3*

MLOps Autopilot Auditor

- Clones a GitHub repository, scores its MLOps maturity from 0 to 100, uses Gemini 2.5 Flash to generate a Dockerfile, mlflow.yaml and tests, and opens a pull request with the fixes. *FastAPI, GitPython, PyGithub, n8n*

AI-Based Real-Time Vehicle Smoke Detection and Reporting System (Final Year Project)

- Trained a YOLOv8 model on 58,000+ annotated smoke and fire images, reaching 85%+ mAP. *PyTorch, OpenCV, Roboflow*

SecureChain SOC

- Blockchain-secured alert validation system for cybersecurity alerts: signed alerts flow through a three-chain design (Edge, Audit, Archive) with cross-chain anchoring, quorum-based validator consensus, tamper-proof audit logs and a real-time SSE dashboard. *Python, HMAC, Ed25519*

Islamic Stories Website

- Built a full-fledged Islamic stories website during my BixForge internship, end to end on the MERN stack. *MongoDB, Express, React, Node.js*

n8n Workflows

- Production n8n workflows for AI agent pipelines, customer-support automation and LLM-powered chat flows. *n8n, Gemini*

EDUCATION

B.Sc. (Hons.) Information Technology, PUCIT, University of the Punjab CGPA 3.29 / 4.00 | 2022 - 2026
Intermediate (General Science), Punjab College for Women, Lahore 93% | 2022
Matriculation (Science), Govt. Girls High School Gulshan-e-Ravi 94% | 2020

CERTIFICATIONS

Google Generative AI Leader Professional Certificate, Google Cloud (Coursera) Feb 2026
Python for Everybody Specialization, University of Michigan (Coursera) Feb 2026
